SETTING YOURSELF UP FOR SUCCESS

GET PREPARED TO ROCK YOUR CISSP CERTIFICATION

GET FAMILIAR WITH THE EXAM. The [exam outline](#) is a great place to start. It's a free resource that details the major topics and subtopics within the 8 domains you will be tested on in the CISSP exam. Reviewing this outline can help set you up for success as you prepare for the exam.

CREATE URGENCY AND DEVELOP A PLAN. Commit to an exam date early. This can help you stay motivated and allow you to work backwards as you create a study schedule. Stay on track and stick to a routine by blocking study time on your calendar each day.

INVEST IN STUDY MATERIALS, STARTING WITH THE CBK GUIDE BOOK. Take advantage of the many [self-study resources](#) available. From a traditional study guide to an on-the-go study app, (ISC)² offers several options to suit your study needs.

REVIEW AND REFRESH YOUR KNOWLEDGE THROUGH TRAINING. Attending a formal training once you've begun studying can help reinforce the topics you've already explored. Choosing official training from (ISC)² provides several benefits, like access to the most up-to-date content with a focus on real-world learning activities and scenarios. You'll also be learning from an (ISC)²-authorized instructor who is an industry expert and certified CISSP. And, with diverse training options available - including in-person and online - you can pick what works best for you and your schedule.

Private, Onsite

Online Self-Paced

BRUSH UP ON LESS FAMILIAR TOPICS. After your training, think about the topics that were covered and if there were any areas where you could improve. Refer back to your study materials and review those domains more closely as you continue to prepare.

PRACTICE, PRACTICE, PRACTICE! Now's the time to assess your exam readiness by going through realistic practice questions. You can find these practice questions in your CISSP Practice Test Book, CISSP study app, and other study materials. Once you're acing the practice exams, you should feel confident that you're ready to take on the real thing!

CATCH SOME ZZZS. Try to relax in the days leading up to your exam. Go to bed at a reasonable hour the night before, and try to eat a healthy breakfast on the morning of your exam. Remember that the exam is 6 hours - you'll probably want to bring along a snack, too.

 **Good luck. You got this!**

STEPS TO GETTING CERTIFIED
